1. This application is in condition for allowance except for the following formal matters:

The term –a—should be inserted in front of the phrase “parallel beam” in claim 1, line 4 and in claim 9, line 3, respectively.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record neither discloses nor suggests an optical head structural having combination limitations of the laser light source, the collimator lens, the lens frame, the beam shaping device, an objective lens, and the photodetector as set forth in claims 1 or 9. Particularly, the prior art of record does not teach that the lens frame is designed to hold said collimator lens in such a manner that a straight line extending in a direction of the parallel beam having the largest ratio of the diameter of the parallel beam outgoing from said beam shaping device to the diameter of the parallel beam incoming into said beam shaping device at an entrance surface is located on the same plane together with a straight line extending in a direction along the displacement in a radial direction of said collimator lens, as recited in claims 1 or 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
